Women's and Coed Teams

Staffing

There is a full-time head coach and two part-time assistant coaches. We will look to elevate one of the part-time assistant coaches in FY22. The coaches will alternate leading the women's and coed teams throughout the fall and spring seasons. The entire coaching staff will work with each team during their respective championship events.

Operating Budget

The operating budget will allow for equipment and uniforms, team travel, recruiting, pre-season training expenses including meals, office supplies, all items consistent with other varsity programs.

Admissions & Recruiting

The head coach will work with the assistant director of athletics for admissions & financial aid on the recruitment plan for both programs. This includes utilizing the admissions support process and identifying prospective student-athletes for pre-reads and likely letters.

Competition Schedules

Both teams will compete in the fall and spring. The teams will have regular season schedules and have the opportunity to advance to national championships.

Strength & Conditioning

Both teams will have access to the strength & conditioning facility, similar to other varsity teams. This includes scheduled times for use and an assigned strength & conditioning coach.

Training Room

Both teams will have access to the training room, similar to other varsity teams. This includes access to all sports medicine services and an assigned athletic trainer.
